PATENT COOPERATION TREATY REC'D 18 AUG 2005 From the INTERNATIONAL SEARCHING AUTHORITY PCT To: LEITZINGER OY Tammasaarenkatu 1 WRITTEN OPINION OF THE 00180 Helsinki INTERNATIONAL SEARCHING AUTHORITY Finland (PCT Rule 43bis.1). Date of mailing 1º 6 -08- 2005 (day/month/year) Applicant's or agent's file reference FOR FURTHER ACTION See paragraph 2 below 16124PC RO International application No. International filing date (day/month/year) Priority date (day/month/year) 26.03.2004 PCT/FI2005/050105 23.03.2005 International Patent Classification (IPC) or both national classification and IPC B23B 41/04 Applicant T-DRILL OY et al 1. This opinion contains indications relating to the following items: Basis of the opinion Box No. I Box No. II **Priority** Non-establishment of opinion with regard to novelty, inventive step and industrial applicability Box No. III Lack of unity of invention Box No. IV Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial Box No. V applicability; citations and explanations supporting such statement Certain documents cited Box No. VI Box No. VII Certain defects in the international application Box No. VIII Certain observations on the international application 2. FURTHER ACTION If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered. If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

3. For further details, see notes to Form PCT/ISA/220.

For further opinions, see Form PCT/ISA/220.

Во	x No. I	Basis of this opinion				
1.		ard to the language, this opinion has been established on the basis of: ne international application in the language in which it was filed				
		translation of the international application into, which is the language of a translation furnished for the urposes of international search (Rules 12.3(a) and 23.1(b)).				
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: a. type of material						
	a. type t	a sequence listing				
		table(s) related to the sequence listing				
	b. format	of material on paper				
		in electronic form				
	c. time o	of filing/furnishing contained in the international application as filed.				
		filed together with the international application in electronic form. furnished subsequently to this Authority for the purposes of search.				
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

ζ,

Cited document:

D1: DE 3208211 A1 D2: US 4503693 A1

The invention relates to an apparatus for cutting an oval hole in the wall of a pipe. The primary object of the invention is to provide an improved and simpler apparatus, which also is readily adjustable, for cutting an oval hole.

Document D1 represents closest background art.

Claim 1

Document D1 reveals an apparatus (fig. 1) for cutting an oval hole in the wall of a pipe. It comprises a power unit (10), a spindle (3) with gear drive and a cutting tool (2), essentially according to the preamble of the claim. In order to perform an elliptic movement of the cutting tool, the tool also comprises a disc (13) with a cam and an adjustable roller (14). The cam is shaped to provide the required axial displacement of the spindle during a full spindle revolution. This will result in an elliptical hole.

Consequently, the claims lack novelty.

For a further example see document D2 where an apparatus (fig. 2) which is able to cut oval holes in the wall of a pipe is revealed.

Claims 2-4

According to what is revealed through document D1 together

.../...

International application No.

PCT/FI2005/050105

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Continuation of: Box V

with general knowledge in the field, the statements in claims 2-4 seam to be solutions obvious to the person skilled in the art.
Therefore, the claims lack inventive step.

•

According to the arguments stated above, the invention according to claim 1 lacks novelty but claims 2-4 are novel. Claims 1-4 are not considered to involve an inventive step. The invention according to claims 1-4 is considered to be industrially applicable.

PATENT COOPERATION TREATY
